Carlos Nadal

Cybersecurity Analyst in training

Detail-oriented Cybersecurity Analyst with a solid foundation in ethical hacking and network security, recently graduated from Holberton School Uruguay. Successfully transitioned from 15 years in the baking industry, leveraging strong problem-solving skills and a disciplined approach to address complex security challenges. Developed a custom email threat detection system using YARA rules and Sigma correlations integrated with Grafana and Loki for real-time monitoring. Proficient in penetration testing, threat analysis, and vulnerability assessment, with practical experience gained through cybersecurity labs, CTFs, and real-world simulation projects. Ready to apply technical skills to protect digital assets in a professional environment..

EDUCATION

Cybersecurity Especialization
Holberton School Uruguay

Montevideo

High School Diploma
Bachillerato De Derecho Liceo 26

12/2019   *Montevideo Uruguay*

GED
Mount Wachussett Community College

07/2008   *Gardner, MA Estados Unidos*

WORK EXPERIENCE

Production Manager
Panaderia Solymareña

03/2022 - Presente   *Solymar, Uruguay*

Logros/Tareas

- Quickly adapted to last-minute orders and production changes, proving problem-solving and adaptability.
- Maintained precision in recipe execution and ingredient measurement, showcasing attention to detail and accuracy.
- Trained new employees on safety and hygiene protocols, highlighting risk assessment and compliance.
- Quickly adapted to last-minute orders and production changes, proving problem-solving and adaptability.

SKILLS

- Network Protection Strategies
- Linux & Windows Security
- Web Application Vulnerability Assessment
- System Vulnerability Identification
- Ethical Forensics Methodologies
- Penetration Testing & Exploitation
- Python & Bash Scripting

PERSONAL PROJECTS

Email Threat Detection System
- Developed a full pipeline using Python, YARA, and Sigma rules to scan email traffic. Integrated Promtail, Loki, and Grafana for alerting and monitoring. Implemented threat quarantine and re-injection mechanisms.

COURSES

arcX Cyber Threat Intelligence 101

Cisco Introduction to Cybersecurity

Cisco Networking

TCM Security Linux

TCM Security Practical Ethical Hacking|

TCM Security Python

TCM Security Practical Bug Bounty

TCM Security GRC Analyst

TCM Security Practical Web Application Security and Testing
